

# ARIHA NOOR

Full Stack Engineer

+923042160150 — [dev.ariha0@gmail.com](mailto:dev.ariha0@gmail.com) — [linkedin.com/in/arihanoor](https://www.linkedin.com/in/arihanoor) — [github.com/ArihaNoor](https://github.com/ArihaNoor)

## Summary

---

Software Engineer with full-stack development experience and hands-on work building AI-powered systems, including a Retrieval-Augmented Generation (RAG) chatbot using LangGraph and an LLM-driven document automation platform deployed for a real accounting firm. Comfortable working across the stack - from LLM/agent orchestration and vector search to production Next.js front ends - in Agile teams.

## Technical Skills

---

**AI / LLM Engineering:** LangGraph, LLM API integration (Claude, Gemini), prompt engineering, AI-based document classification

**Automation & Integration:** n8n workflow automation, Google Workspace APIs (Gmail, Drive), escalation/notification systems, REST APIs

**Full Stack Development:** React.js, Next.js, Node.js, Supabase, Firebase, TypeScript, JavaScript, Python

**Tools & Practices:** Git, Linux, Claude Code, Cursor, Agile/Scrum, sprint planning, code review

**Soft Skills:** Communication, cross-functional collaboration, adaptability, problem-solving, time management

## Experience

---

### Invitrex

June 2024 – Present

*Software Engineer*

*Faisalabad, Pakistan*

- Built DocChase, an AI-powered document automation platform for accounting and bookkeeping firms, now live in production for a real client (see AI Projects below for details).
- Worked across 7+ projects in an Agile environment – sprint planning, daily standups, and iterative delivery – collaborating on both front-end and back-end systems.
- Collaborated closely with team members to maintain, scale, and support real-time production systems.

### V3 Solutions

August 2023 – October 2023

*Junior Web Application Developer*

*Faisalabad, Pakistan*

- Worked on 2 real-world projects, including a Health Care project focused on an AI-based Dental Disease Recognition System.
- Contributed to database design and UI development using React.js and Material UI.

## AI Projects

---

**DocChase** | *Next.js, n8n, LLM (Claude) Document Classification, Gmail API, Google Drive API*

- **Live:** doc-chase-phi.vercel.app
- Built and shipped an AI-powered document-chasing platform for accounting and bookkeeping firms, live in production for a real client.
- Owned the end-to-end design and deployment of an AI platform, translating an ambiguous client need into a production-ready system handling of document classification autonomously.
- Built an LLM-based classification pipeline (Claude) that automatically identifies and routes client documents (W-2, 1099, K-1, bank statements, etc.), with 80%+ of uploads handled with no human touch.
- Designed an escalating, rate-limited reminder engine (n8n) with quiet hours and a full audit trail to automate client follow-ups.
- Integrated Gmail and Google Drive APIs so requests, reminders, and filed documents run through the firm's own email and folder structure.
- Built the Next.js client upload flow (magic-link, no login) and a live missing-documents dashboard for staff to track status and review exceptions.

## RAG Knowledge-Base Chatbot | *Python, LangGraph, Supabase (pgvector), LLM APIs*

- Built a Retrieval-Augmented Generation chatbot using LangGraph to orchestrate the conversation/agent flow in Python.
- Implemented vector-based document retrieval with Supabase (pgvector) to ground LLM responses in a knowledge base.
- Designed the retrieval and response pipeline to return accurate, context-aware answers instead of relying on the model alone.

## Momentum Games | *React, Firebase, Gemini AI*

- **Live:** [shop.crime-cases.de](https://shop.crime-cases.de)
- Developed a full-stack game application using React and Firebase.
- Implemented multi-stage game flows with AI-generated responses using the Gemini API.
- Managed multiple game products with distinct gameplay logic and user flows.

## Other Projects

---

### Acenrix | *Next.js, Tailwind CSS, Framer Motion*

- **Live:** [ascenrix.vercel.app](https://ascenrix.vercel.app)
- Developed a fully responsive marketing website using Next.js with modern UI animations.
- Implemented smooth transitions and interactions using Framer Motion.

### Thadda | *Next.js, TypeScript, Redux*

- **Live:** [thadda.com](https://thadda.com)
- Enhanced frontend architecture; integrated Google Authentication and Moyasar payment gateway.
- Developed a fully responsive UI styled with Tailwind CSS.

### Shahid Green Hill Meat | *React, HTML, CSS, JavaScript*

- **Live:** [shahidgreenhill.com](https://shahidgreenhill.com)
- Built and deployed a responsive, mobile-first business website with cross-browser compatibility.

### Budggy | *Frontend Dashboard*

- **Live:** [budggy.com](https://budggy.com)
- Built an admin dashboard to visualize business analytics and data-driven insights.

### Proctorial Prism | *MERN Stack, AI – Final Year Project*

- Built an AI-enabled online test portal with camera, microphone, and window-monitoring to prevent malpractice.

## Education

---

### National Textile University

*Masters in Software Engineering*

CGPA: 3.92

**Sep. 2025 – Present**

*Faisalabad, Pakistan*

### National Textile University

*Bachelor in Software Engineering*

CGPA: 3.82

**Oct. 2020 – Jul 2024**

*Faisalabad, Pakistan*

## Leadership / Extracurricular

---

### Software Engineering Society

*Assistant Programming Head*

**Spring 2023 – Fall 2023**

*National Textile University*

- Led programming workshops and events, fostering a culture of learning among students.
